

## Oasis Wellness Center Press Release

Everyone has heard the phrase that explains timing and providence...“when the stars or planets align in the universe”. Well that has happened to three individuals whose life paths have converged simultaneously to create Oasis Wellness Center in Bartonville Town Center.

Dawn Heyl, ME, (Medical Esthetician), Angela Killeen-Hirschhorn, C-FNP, and Dan Forrer, DO have combined their unique skill sets to create a full-service, results-based esthetic, health and wellness center in the heart of North Texas. Truly the whole is greater than merely the sum of the parts.

**Dr. Dan Forrer** has been practicing medicine for twenty years and has extensive experience in family medicine, office based orthopedics and sports medicine, worker’s compensation injuries as well as Attention Deficit Disorder in the adolescent and adult population. His areas of interest also include weight loss and the newer hormone replacement protocols to maximize your health. Dr. Dan and his wife Karen have been married of 28 years and currently have six teenage children. “I’m striving to offer the best skincare and wellness services in an empowering and loving environment.”

**Angela Killeen-Hirschhorn**, C-FNP, is an energetic and enthusiastic proponent of living with vitality. She has been a nurse practitioner for 5 years, and has trained under two of Dallas’ most respected plastic surgeons. Angela is an expert in Botox treatments, having treated truly thousands of patients to their complete satisfaction. She also had a front row seat in 2004 when the dermal fillers were first introduced and has been performing facial sculpting since its inception. Angela has a wonderful “eye” to visualize the outcome and the skillful hands and expertise to bring about the “look” you desire. She will also address hormone replacement and women’s health issues...between workouts, protein shakes and hot yoga. She is a committed mom to two teenagers and lives life to the fullest, and she wants the same for you.

**Dawn Heyl**, ME, makes this team complete. As the Official Esthetician for the Miss Texas Pageant since 2006, she has addressed the skin care concerns for each reigning Miss Texas for the past four years. According to Dawn, “my treatments are results oriented and I welcome such challenges as vascular blemishes, anti-aging, rosacea, ethnic skin problems, adult and teen acne. I use a clinical approach, tempered with intuition and experience (13 years), to treat my patients. My goal for each person is skin so healthy and texture so clear and smooth, that one can choose to wear makeup...or not!”

Dawn will have at her fingertips an E-max laser by Syneron, which utilizes Elos radiofrequency technology. This is the safest, state of the art technology that addresses skin pigmentation issues, skin laxity and wrinkles, and collagen regeneration, through subablative rejuvenation which is beyond fraxel, for the ultimate in the “skin rejuvenation” experience and results. Our Elos hair reduction technology is equally impressive in that it addresses previously untreatable hair color such as blonde and red, as well as the darker pigmented skin tones. She is also certified to deliver Intraceutical Hyperbaric Oxygen treatments, an exciting and revolutionary skin care procedure that will instantly infuse

hyaluronic acid-a structural component of skin-through a hyperbaric oxygen infusion process, that instantly and remarkably hydrates and firms the skin. This treatment is relaxing and soothing and suitable for all skin types. You have to experience it!

All your health care needs for the family along with these special results based wellness and skin health care treatment modalities can be experienced in one place...the Oasis.
